Re: Food Service

The USDA provided updated information regarding food services at the end of the school week. I'm reaching out today to notify of the upcoming changes.

Starting Monday 9/14, our food service department has the option to switch back to the Seamless Summer Option. This is similar to how we operated last spring and summer during the on-set of the pandemic. Essentially, we will be providing free meals to all **K-12 enrolled students** until December 31 or until funds are depleted, whichever comes first.

It is important to note that this program differs from last spring. We will be operating as a closed site and therefore only providing these meals to **enrolled students** between the grades of **Kindergarten to 12th grade**. Our **remote learning students also qualify** for these meals as they are enrolled in K-12. We ask those remote learning families to please contact the school office if you intend to pick up meals.
